

Chinese Speech Annotation & ASR Evaluation

中文语音标注与 ASR 评测作品样例
Prepared for xAI AI Tutor - Chinese application

Candidate: Ye Ziyang

Focus: Mandarin Chinese audio transcription, annotation methodology, and AI data quality evaluation

Source Note: Self-created simulated customer-service dialogue. No private, client, or proprietary data is included.

Audio Note: This annotated transcript can be paired with a short self-recorded Mandarin sample if requested.

1. Task Overview / 任务说明

This sample demonstrates my ability to evaluate Chinese audio data for speech recognition and voice interaction training. The evaluation includes transcription accuracy, speaker separation, pronunciation, prosody, noise, ambiguity, and model-readiness.

本样例展示我对中文语音数据进行标注与评测的能力，覆盖：转写准确性、说话人分离、发音、语调、节奏、背景噪声、歧义判断、是否适合用于模型训练等。

2. Annotation Schema / 标注维度

Field	Description
Language	Primary spoken language
Chinese Variety	Mandarin, Cantonese, Taiwanese Mandarin, Sichuan Mandarin, etc.
Speaker Count	Number of speakers
Accent Strength	None / Light / Medium / Strong
Audio Quality	Good / Acceptable / Poor
Background Noise	None / Mild / Moderate / Severe
Overlap	None / Mild / Frequent
Disfluency	None / Mild / Frequent
Emotion / Tone	Neutral / Polite / Frustrated / Excited / Uncertain
ASR Difficulty	Low / Medium / High
Training Suitability	Suitable / Suitable with caution / Not suitable
